

RISE SERIES

Motorized
display lifts

Introduction

Vogel's introduces RISE: a product line of motorized display lifts

Vogel's presents its product line of motorized display lifts: RISE. The product line is specially designed for use in educational and business environments. RISE offers professional AV installers and IT companies a range of stylish, safe and user-friendly electrically operated solutions for installing large displays and interactive screens.

The product line came about through intensive cooperation with subsidiary SmartMetals Mounting Solutions.

Vogel's has a long track record of providing professional solutions. SmartMetals has always been at home in the education market and one of its specialties is lift systems. All this combined knowledge and experience has resulted in the wonderful RISE product line.

RISE to the occasion

Vogel's motorized display lifts

A series of motorized display lifts that allow you to intuitively and safely position a display in the right place and at the right height. Always safe thanks to the durable and stylish design, which meets the highest international safety standards. A top-down installation guarantees easy and quick assembly.

Vogel's. For Sure.

- ✓ Suitable for large displays of up to 86 inches and weighing up to 120 kg.
- ✓ Electrically height adjustable up to 980 mm.
- ✓ Motorized movement at 50 or 80 mm per second with the QuickRise™ system.
- ✓ Very user-friendly. You can intuitively raise the display to the desired height with the push of a button.
- ✓ Can be expanded with various accessories

Available as a trolley, floor stand and floor-wall solution

RISE motorized display lifts are available in different versions.

- The trolley version offers maximum flexibility. This mobile solution can be easily moved to any location within a building.
- The fixed wall system offers maximum safety, especially in educational environments. The display is mounted close to the wall and rests on the floor. All cables are fully concealed.
- The floor stand is an excellent choice if you want an interactive display at a fixed location, where wall mounting is not an option.

RISE: the safe, intuitive, motorized display lift for use in education

Vogel's display lifts are compact, safe, durable and very user-friendly. This makes them ideally suited for use in educational settings, where large digiboards or touchscreens are used daily during lessons and lectures.

User-friendly for teacher, pupil and student

The intuitive operation of the lift system means that anyone, big or small, can work with it effortlessly. With a simple push of a button, you can safely raise the display to the desired height.

Secure solution for large, interactive displays

RISE also rises to the occasion in terms of safety. With a focus on use in education, children's safety has been taken into consideration in the design. The base is specially designed to prevent tripping. And thanks to the cable management system, cables are neatly and safely concealed.

During the upward and downward lifting movement, the display and system are protected against damage. If the display accidentally comes into contact with a chair or other object, the display lift automatically moves back in the opposite direction thanks to the Anti Collision mechanism.

Always a tailor-made solution

RISE motorized display lifts are available in different versions. The fixed wall system offers maximum safety in educational environments. The display is mounted on the floor and close to the wall, and all cables are fully concealed. The trolley version offers maximum flexibility. This mobile solution can easily be moved to any location within a building.

All RISE motorized display lifts can be expanded with a whiteboard set (65, 75 or 86 inches). Other accessories, such as a laptop support or hidden storage unit, complete the set-up.

For corporate use

The best solution

The multi-purpose trolley version offers maximum flexibility. You can move it smoothly and easily from one place to another. The floor stand is an attractive solution for a reception area, for example.

Secure solution for large displays

The design also considers the safety of the user. The base is specially designed to prevent tripping. And all corners are rounded, making maintenance and cleaning easier and safer.

Customised accessories

All RISE motorized display lifts can be expanded with a laptop support, video conferencing camera platform, sound bar mount or hidden storage unit. A must in any corporate or conference environment.

In a modern office or meeting environment, you don't want a bulky installation for your screens; you want a slim, compact solution. With RISE motorized display lifts, you opt for design, innovation and ease of use.

The timeless design with rounded corners, the cables neatly concealed in a cable duct, the high-quality materials and the attractive finish ensure that RISE display lifts blend seamlessly into any corporate environment.

Thanks to the intuitive operation of the lift system, you can effortlessly move the display to the ideal height. With QuickRise™ (EU patent pending), you can raise and lower a display electrically at a speed of 50 or 80 mm per second.

Easy to install

Top-down installation makes mounting the RISE motorized display lifts very easy. The compact column is supplied complete. You only need to mount the lift on the trolley or the floor stand. The floor-wall solution can be installed safely and quickly with just four bolts. Vogel's ClickLoc™ (EU patent pending) allows you to attach the display to the frame with a single solid click.

Safety first

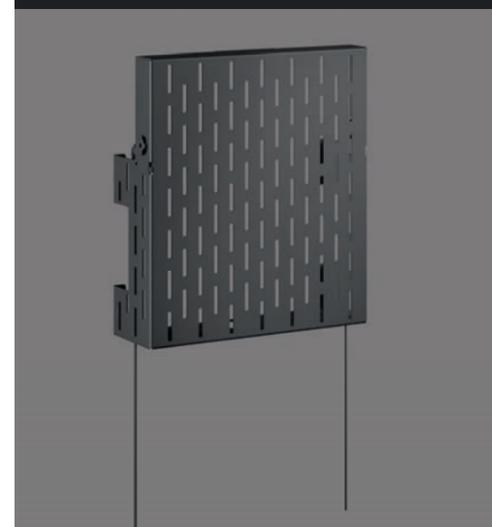

At Vogel's, safety comes first. RISE motorized display lifts therefore meet the highest international safety standards. With TÜV and CE certification (UL and GS certification pending), they have all certifications, which is unique in the market. A display cannot be mounted more securely.

The display lifts are equipped with Anti Collision, a finely tuned safety mechanism that prevents the display and system from being damaged when moving up or down. If obstructed, the display moves back in the opposite direction.

The design also considers the safety of the user. The base is specially designed to prevent tripping. And all corners are rounded, making maintenance and cleaning easier and safer.

Customised accessories

By adding extra accessories, you can easily turn a motorized display lift into a comprehensive solution. All RISE motorized display lifts can be expanded with accessories such as a made-to-measure whiteboard set (65, 75 or 86 inches), laptop support, video conferencing camera platform, sound bar mount or hidden storage unit.

Product details

CIS®
The Cable Inlay System ensures that cables are neatly and safely concealed

Interface strips
For displays of up to 86 inches and weighing up to 120 kg

Release straps
For easy release of the display

Safe base construction
(trolley | floor stand version) Reduced risk of tripping

100 mm swivel castors
(trolley version)
Thanks to the sturdy 100 mm swivel castors, the lift can be moved easily over any surface.

Accessories
Can be expanded with a 65", 75" or 86" whiteboard set, laptop holder, video conferencing platform, sound bar mount and hidden storage unit.

Clickloc™
(EU patent pending)
Mount the display to the frame with one solid click

Stroke length up to 980 mm

Anti Collision safety mechanism
On contact with an object, the display lift moves in the opposite direction

QuickRise™
(EU patent pending)
Display electrically lifted or lowered at a speed of 50 or 80 mm per second

TÜV tested at 5x maximum weight capacity.
CE certified (UL and GS certification pending)

	RISE A141 Video Conferencing Camera Support Mount for RISE Motorized Display Lifts

Why opt for a RISE motorized display lift?

1. RISE motorized display lifts are quick and easy to install thanks to convenient top-down assembly.

2. RISE motorized display lifts are TÜV and CE certified and therefore comply with all international safety standards. A special Anti Collision safety mechanism protects the display and system by automatically moving in the opposite direction in the event of an obstruction.

3. Only durable, high-quality materials are used for RISE display lifts, ensuring a long service life. In addition, the products are packaged in the most environmentally friendly way possible, so that the carbon footprint and waste streams are kept to a minimum.

4. Thanks to their timeless design, RISE display lifts blend in beautifully in any room.

5. Operation is incredibly simple. You can intuitively raise the display to the desired height with the push of a button. A wide stroke length provides options for a very low or high position, suitable for users of all ages and heights.

With RISE, you choose sustainability

Sustainability is an important theme for Vogel's. As a market leader, we consider it our duty to take good care of people and the environment. RISE motorized display lifts are therefore designed to last.

To ensure a long service life, we subjected the display lifts to endurance tests of more than 30,000 cycles. You can therefore be confident of offering a safe and reliable product with a RISE display lift.

Not only is the design timeless and future-proof, but we have also chosen sustainable, high-quality materials. Materials that have the least possible impact on the environment and increase the service life of the display lift.

For the finish, for example, we use RoHS-certified* paint, a paint that is 100% free of harmful substances. In addition, we apply strict environmental guidelines in the production process, in line with international agreements.

***Restriction of Hazardous Substances**

The packaging is also sustainable

A sustainable product needs sustainable packaging. That is why we have made the packaging of RISE motorized display lifts as environmentally friendly as possible. For example, the packaging does not contain EPS (Styrofoam) or EPP. We have also reduced the use of single-use plastics by 85% compared to the old packaging.

Thanks to the sustainable packaging, waste is easier to separate and waste streams are kept to a minimum.

Why Vogel's?

The best solution

In our Product Development Centre, we develop products that fully meet the wishes of the end user and those of the installer. This is the starting point of any new product development process at Vogel's. What do we add to that? Future-proof design. So that, even after many years of intensive use, the end user is as happy as ever with it.

The best materials

At Vogel's, we don't compromise on quality. You have to be confident that you have bought a very strong, solid and sustainable product. For us, quality is key in every step of the design process.

Maximum safety

Vogel's products are almost always TÜV-certified. An independent guarantee that you have an absolutely safe product. We test many products for the professional market at five times the maximum weight capacity.

Quick and easy installation

Every Vogel's product is designed for easy mounting. As an installer, this saves you a lot of time, especially on large projects.

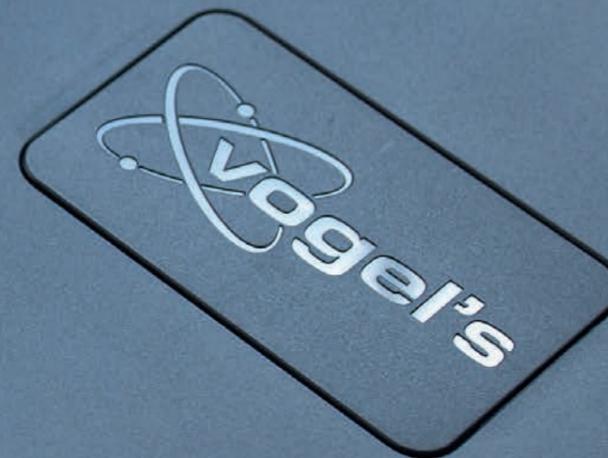

Service and support

As easy as our solutions are to install, sometimes extra support is needed. In corporate environments, you also encounter complex and large installation challenges. Our engineers and product designers have a great deal of experience and are happy to offer you expert advice.

Leading for almost 50 years

As an AV installer, you can rely on Vogel's. For almost 50 years, Vogel's has been developing innovative, reliable and user-friendly mounting solutions for both the consumer and professional markets. Solutions that excel in design, safety and ease of installation. So you never choose just any mounting solution. You choose the certainty of the best solution.

Vogel's. For Sure.
