The birth of the Vogel's Compose® adaptable cabinets

CAD models, mockups and prototypes are made to thoroughly test every aspect of the design

EUROPEAN DESIGN BY VOGEL'S

Want to get more out of your entertainment equipment? Vogel's can help. For years, we've been creating outstanding custom furniture that is designed especially to support and enhance flatscreen TVs, Hi-Fi and audio visual components. Our furniture range is complementary to Vogel's sophisticated range of mounting solutions.

Designed to entertain you

At Vogel's, we have long experience in designing wall mount and furniture concepts that meet the specific requirements of home entertainment equipment. In-house product design, development and engineering are key strategic focal points of our company and we continue to invest heavily in these areas. This has produced a steady stream of innovative concepts and products. We were one of the first to design furniture to support flatscreen TVs. And the elegant Vogel's Compose® flexible modules and adaptable cabinets can be completed with manual and remote controlled flatscreen TV adapters.

We keep our pulse on market developments

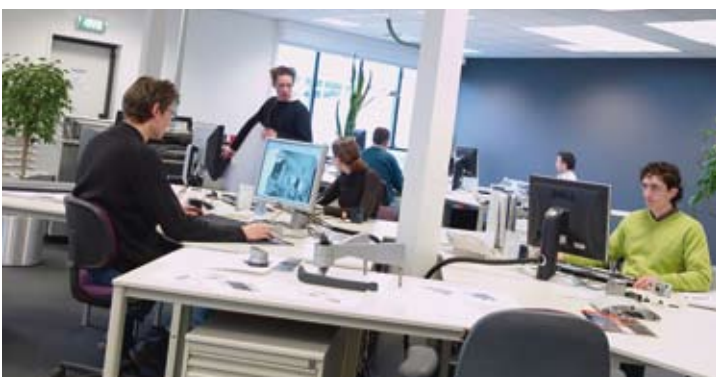

Vogel's has a strong marketing department that has a close relationship with our business partners and end customers. They help keep us up-to-date on the latest developments and trends in our markets. In addition, we carry out independent research and visit all relevant trade shows and events to identify new market opportunities. This provides valuable input for our strategic product decisions.

Dedicated industrial design department

Over the last 35 years, our large team of industrial designers and engineers has built up highly specialised knowledge about consumer preferences, materials, functional requirements, ergonomics, and manufacturing processes for designing support products. Our experts provide valuable technical input on the feasibility of new designs before starting a project. This expertise helps us find new ways of doing things and helps us come up with the most creative concepts for new products.

Designed for entertainment

In the end, the mark of a good design is how well it works. Our furniture is designed to give the best solutions for entertainment equipment. Innovative, universally suitable, trendsetting, highly functional and crafted from the finest quality materials. That's the mark of an expert. That's the mark of Vogel's.

Vogel's industrial designers and engineers each contribute a different perspective and skill to come up with the most innovative solution

QUALITY – FROM START TO FINISH

Vogel's products are built to exact specifications from the most high quality, longlasting materials available. We offer a broad assortment of furniture and stands in virtually any material or style, including glass, wood and aluminium. Models are available with or without a built-in support.

Extra options

Many extra options are available, including additional colour and/or glass combinations, wheels and an LCD adapter to mount an LCD/Plasma flatscreen.

Guarantee

5-year guarantee for all furniture and 2-year guarantee on electronic parts and remote control.

D-SERIES

Aluminium and glass

These models combine solid steel and high-grade polished aluminium alloy frames with crystallite safety glass to create a modern and open look. The transparent topplate and shelves are made of highly polished glass with rounded corners and are completely flat to provide more room for equipment. The topplate is securely and elegantly sealed with UV glue. Each topplate can hold up to 90 kg / 198 lbs of weight.

Q-SERIES

Wood and glass

This line is constructed of high quality MDF with a high gloss finish. The solid construction provides stable support for the largest TV screens and A/V equipment. A variety of colours and finishes are available to fit any interior or style. The self closing drawers offers space for CDs, DVDs and remote controls.

EMO®

Electronic Motion (EMO)

Remote controlled products for easily turning your flatscreen TV to the optimal viewing position.

Black silkscreen or clear crystallite safety glass is available.

VOGEL'S COMPOSE®

AV FURNITURE

Maximum choice – now and in the future

When it comes to entertainment equipment furniture, today's consumers want great functionality and an appealing design that blends well into their interior. Vogel's new Compose system meets all these criteria and more, featuring streamlined, connectable products that fit seamlessly together in terms of design and finishing. What's more, this unique system can actually adapt and grow to meet changing needs, for instance when new audio/video equipment or a larger LCD/Plasma screen is purchased. The Compose line gives consumers maximum choice, allowing them to effectively organise their entertainment equipment exactly the way they want – today & tomorrow.

FLEXIBLE

Flexible furniture

With Compose, consumers can combine one or more modules and furniture units to create their perfect entertainment platform. Modules can be placed on the floor, but also hung on the wall to create a spacious, floating effect.

The special LCD/Plasma accessory (optional) makes it possible to turn the screen to achieve the optimum viewing angle. And when AV modules are placed vertically, they can also easily accommodate PCs, game consoles and more. Compose is really an all-round multi-media entertainment solution!

Guarantee

5-year guarantee for all furniture

ADAPTABLE

Floor and wall furniture

The Vogel's Compose® floor and wall furniture expands consumers' options even further, allowing them to adapt the width of the entertainment unit from 100cm up to 140cm to exactly match the size of their LCD or plasma screen.

LCD/Plasma accessory

The manual adapter module makes it possible to turn the screen up to 30° left and right, to achieve the optimal viewing angle. Even more convenient is the electronic module which allows the consumer to turn the screen via remote control from the comfort of their chair.

SMART

Clever use of space

Colours

Consumers even have a choice in finishes for the high-quality panels – they are available in both trendy Walnut and exotic Wenge.

Doors

Infrared-transparent covering on doors enables remote-control operation and allows air ventilation when doors are closed.

Cable Inlay System

Cable Inlay System (CIS®) neatly organises and conceals cables from view.

VOGEL'S COMPOSE®

AV FURNITURE

Basic & AV-modules

Suitable for audio, DVD, PC, projector, game console, LCD/Plasma and DVD equipment

- Modules can be mounted on the wall or placed on the floor (basic module can stand-alone only be mounted on the wall)
- Connectable modules can be installed and combined in variety of ways
- Universal: fit almost all LCD/Plasma screens up to 45 kg / 99 lbs
- Basic module is suitable for screens up to 42 inch. A combination of basic and AV modules together is suitable for screens up to 55 inch / 140 cm
- Transparent, infrared metal covering on doors enables remote-controlled operation and ventilation when doors are closed
- When mounted on the wall, the modules extend slightly forward, creating a unique floating effect
- Both basic and AV module can be seamlessly integrated with Compose furniture units
- Modules can be placed horizontally and vertically (AV module) and modules can be mirrored
- Cable Inlay System (CIS®)
- Basic module can support: 1 AV device, max 10 kg / 22 lbs
- AV module can support: 2 AV devices, max 20 kg / 44 lbs
- Optional: can be combined with CFA 140/CFAE 140 RC to turn from side-to-side
- Easy assembly

For technical specifications, see page 17.

Floor/wall AV module CFM 060

Floor/wall Basic module CFM 105

Floor & Wall furniture

Suitable for audio, DVD and LCD/Plasma equipment

- Designed to be mounted on the wall (CFW 140) or placed on the floor (CFF 140)
- Width of units can be adapted for every screen dimension
- Suitable for screens up to 55 inch / 140 cm or up to 45 kg / 99 lbs
- Can be combined with AV modules and with the manual or remote controlled accessory CFA 140/CFAE 140 RC
- Can support AV devices up to 20 kg (44 lbs) on each side (total 40 kg / 88 lbs)
- Cable Inlay System (CIS®)
- Easy assembly
- A unique line which can actually adapt and grow to meet the consumer's changing needs

LCD / Plasma accessories

Suitable for LCD/Plasma equipment

- Compose Flat Accessory Manually max 140 cm / 55 inch (CFA 140)
- Compose Flat Accessory Electronic max 140 cm / 55 inch (CFAE 140 RC)
- Easily turn it to any viewing perspective (30° each side) manually or by remote control

In 1973 Vogel's, based in the Netherlands, introduced the world's first loudspeaker support. Now, 35 years later Vogel's is recognized worldwide as the industry's expert in the design, placement and manufacturing of mounts and furniture for audio and video equipment. Over the years Vogel's introduced many new and innovative products to the market.
